Governor Ruth Ann Minner
Dover Office
Tatnall Building
William Penn Street, 2nd Floor
Dover, DE 19901

Dear Governor Minner:

We would like to express our concerns about the toxic emissions coming from the Indian River Power Plant. The toxic emissions affect the population living, fishing, crabbing and just enjoying the many pleasures associated with the Indian River.

As we're well aware Delaware has a high cancer rate. By imposing higher restrictions placed on pollution and lowering the amount of toxic emissions etc. discharged into the air and water, will help reduce the cancer rate in the state. This would be a blessing and help reduce the medical cost to all.

Please think of the overall health of the citizens of Delaware and make industry stop dumping toxic waste into the air and water of our State. We have enjoyed many years of recreation on the Indian River. As senior citizens we look forward to seeing you do the right thing for all of us.

Sincerely,
William F. Harkins
Marie V. Harkins
